DETAILED ACTION***Allowable Subject Matter***

Claims 1-10 are allowed. Amended claim 1 and dependent claims 2-10 are allowable over the prior art as the prior art neither anticipates nor renders obvious the device as claimed. In particular the recitation in independent claim 1 of "at least one piercing element formed on an inner wall of said hollow barrel, wherein said at least one piercing element pierces said piston thereby preventing re-use of the injection syringe" is not disclosed in the prior art. U.S. Patent 6,117,107 to Chen does disclose a piercing element that prevents re-use of an injection syringe, but does not disclose that the piercing element is formed on an inner wall of a hollow barrel, nor that the piercing element pierce a piston. Moreover, prior art reference U.S. Patent 4,391,273 to Chiquiar-Arias discloses piercing element in the hollow interior of a syringe, however the reference does not disclose that the piercing element is formed in an inner wall of the hollow barrel, nor that the piercing element pierces a piston. Furthermore, it would to be an obvious modification of these prior art references to incorporate the piercing elements onto the interior wall of a hollow barrel such that the piercing element pierces a piston, since the piercing element in the prior art reference embodiments teach away from piercing a piston element.
